

CLOTHING & MERCHANDISE AUTUMN WINTER 2014

**TRIUMPH**

## PERFORMANCE MID LAYERS.

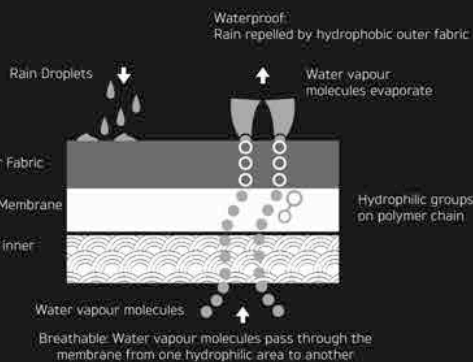

Our new range of performance mid layers work perfectly with our riding garments to provide a comprehensive Cold Weather protection system against the harmful effects of Wind Chill.

The fabric has active stretch, windproof and breathable performance combined with great water resistance. This type of thermal clothing replaces ineffective and bulky layers.

Cold Killers Softshell is a three layer laminate with a very tough and tightly woven stretch fabric on the outside and cosy 3D fleece liner. In between is a hydrophilic membrane to enhance the weather protection.

The three elements work together to deliver an incredible balance of protection against the wind and rain, excellent breathability, balanced warmth and dynamic and soft stretch fit. The technical combination of Softshell and 3D fleece allows warm air to circulate easily, thereby dramatically reducing the overheat/chill-down cycle associated with conventional layering.

**Comfort and protection for the perfect ride.**

## SPEED RECORD COLLECTION.

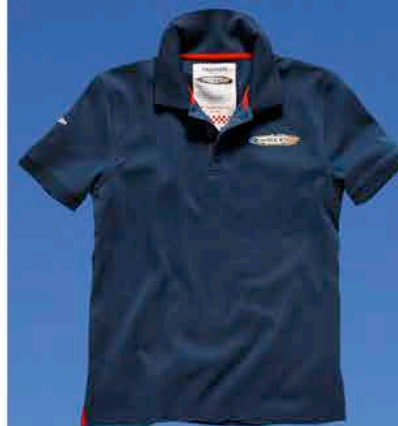

On September the 6th 1956, Johnny Allen set the world absolute speed record of 214.40 mph for a motorcycle at Utah's Bonneville Salt flats.

Texas racer, Allen, set multiple speed records at the controls of the "Texas Cee-gar", a stream-lined outershell that encased the Triumph powered motorcycle, resulting with the 214.40 mph speed record.

The Triumph Bonneville motorcycle was born.
